Louis R. Rose
President & CEO
Scion BioMedical, Inc.

Dear Mr. Rose

I wanted to thank you for the samples of Clo-Sur + P.A.D. you sent. By way of introduction, I am a full time physician wound care specialist in Indianapolis having practiced in that specialty for over 18 years. In addition, I provide in-home circumcision services to babies born in their homes. We rarely have any untoward bleeding from the circumcisions but even the slightest ooze can cause parental consternation. I have used your product on several occasions with immediate hemostasis. It also resorbs and "falls off" shortly thereafter which further minimizes parental concerns. It is now a regular part of my home circumcision kit.

In my wound care practice, we perform in-office debridement of non-viable tissue which occasionally involves muscle and fascia to a limited degree. Achieving hemostasis in these wounds previously meant suture ligation, repeated cauterization, or direct pressure for a prolonged period with the attendant risk of them rebleeding after they left. We have used the product on several recent patients and were very pleased not just with the rapidity of hemostasis but more, the minimal rebleeding we identified after discharge to home. The incorporation of the product into the wound did not cause any problems and I am interested in seeing its effects on promoting faster wound healing (for which I would request more samples)

I thank you for your persistence in getting me to try Clo-Sur + P.A.D. and am happy to offer the above. Based on my experience and success with it, I will be continuing to use it as a necessary tool in my practice

Yours truly

Michael S. Miller DO, FACOS, FAPWCA, WCC
CEO and Medical Director - Miller Care Group
